CHAIRMAN'S SPEECH

Dear Shareholders,

The financial year 2012-13 has been the most challenging period of twelve months that I have encountered during my association with the RAJ brand since 1966. The performance of Raj Oil Mills Limited, the Company to whom the brand was assigned in 2007, has hit a rough patch on the operational as well as financial front. A number of external factors, global as well as national, and internal factors have influenced this operational and financial downturn of the Company.

In the year that went by, there was a significant increase in global production of edible oil, more particularly in South East Asian countries of Indonesia and Malaysia. However, the global demand for the product remained stagnant which resulted in declining of edible oil prices across the world. This over production also meant higher level of inventory in these countries which prompted them to export these excessive quantities to demanding countries like India at cheaper rates.

India, which imports about 60% of edible oil consumed during a particular year, experienced a steady import of edible oil from these countries. In furtherance to this global impact of excessive production, the Government of India issued policies in favour of direct import of refined oil over crude oil. Both these factors resulted in turning the tide in favour of traders and packers as against the manufacturers involved in the edible oil industry. The traders and packers, who import edible oil, now influence the pricing mechanism of this industry in a manner never seen before. The weakening of the rupee and a subsequent increase in the cost of imported edible oil has had a little impact on the influence exerted by this class of traders.

This voluminous flow of imports in the market at a cheaper price has ensured that manufacturers like your Company have not been able to pass on the increase in production cost to its customers by increasing the price of its products. These developments have impacted the Company's liquidity position through higher quantities of inventory remaining unsold. The working capital cycle of the Company has taken a tremendous hit and the management of the Company is trying its best to come out of this crisis sooner than later.

As a Chairman and Promoter of this Company, I assure to all stake holders that the Management will take all the necessary steps to safeguard the interest of all concerned. To mitigate the risk presented by the current macro environment and to improve the operational efficiency of the Company with an aim to reduce the price, the management has already started implementing a restructuring plan with an emphasis on changing the operational model of the Company and aligning the same with the current market practices.

Also, owing to the tough financial conditions faced by the Company, the Board of Directors of the Company have upheld the decision of remuneration committee of not paying any remuneration to the Whole-Time Directors of the Company till the financial condition of the Company improves.

As a person who has nurtured this brand for more than half a century, I assure all the stakeholders as well as the consumers of our products, that the changes in the operational model of the Company to overcome this down turn will not come at a cost of quality. The pureness of this brand is at the heart of success and growth story as well as longevity enjoyed by this brand since 1943.

I assure all the stakeholders that the management is doing whatever it can to overcome this downturn. I know that the Company will be on the growth path once again.

I thank the shareholders who have reposed faith in Raj Oil Mills Ltd. You have always stood by us in all our endeavors and I on behalf of the board individually and severally acknowledge your support. With 60% imports, the edible oil industry has capacities for good growth and Raj Oil Mills Ltd envisages the same.

A long standing brand has to be enriched and a legacy to be built upon and taken strongly forward.

With the best wishes of all associated with us I see us achieving the expectations from the customers and the industry as a long term player in the times to come. I apologize for grievances, caused due to delay in sharing of information, if any. At this stage, all I ask is not for a lighter burden but broader shoulders.

Thanking You.

MANAGEMENT DISCUSSION AND ANALYSIS**Forward – Looking Statements:**

This Report contains Forward – Looking Statements. Any, statement that address expectations or projections about the future, including but not limited to statements about the Company’s strategy and growth, product development, market position, expenditures and financial results, are forward looking statements. Forward looking statements are based on certain assumptions and expectations of future growth. The Company cannot guarantee that these assumptions are accurate and will be realized. The Company’s actual results, performance or achievements could thus differ materially from those projected in any such forward-looking statements. The Company assumes no responsibility to publicly amend, modify or revise any forward-looking statements, on basis of any subsequent developments, information or events.

Scenario of Global and Indian Edible Oil Industry:

During the financial year 2012-13, the global production of edible oilseeds was around 470 million tonnes. This quantity was mainly dominated by production of soya oil seed production followed rap seed, sunflower, palm, kernel and others.

During the year under review, the global palm oil production increased by around 6.5% to 54,322 million tonne. This was primarily on account of increase in production of palm oil in Indonesian and Malaysia which contribute around tribute about 87.4% of global palm oil production. However, the increase production was not paralleled by increase in demand. This mismatch resulted in increased inventory and decrease in prices.

India is one of largest producers of oilseeds in the world along with China and the United States of America. The total area under cultivation with respect to oil seed is approximately around 27 million hectares which enable the production of 23-28 million tonnes of oil seeds every year depending on the monsoons.

The per capita consumption though grew by 8.1 per cent over the last five years up to FY12 .As the consumption of edible oil exceeds the domestic production, India imports around 60% of the edible oil it consumes. Palm oil contributes about 75% of the total imports. Palm oil, being the cheapest, constitutes the largest proportion (around 44%) of the oil consumed. Palm oil and soybean oil are among the most commonly consumed oils in India.

Financial Management Practices and Reviews:

In a highly competitive market characterized by low margins, the Company was unable to pass on the increase in cost of production to its customers by increasing the price of its products. Increase in inventory resulted in higher working capital cycle and lower operating cash flows which impacted the turnover of the Company for 2013.

However, the main emphasis of the Company will be on changing the operating structure of the Company with renewed focus on lowering the associated fixed cost of production. The Company is now contemplating new distribution model to decrease the time lag associated with disposing off the current high inventory levels.

Summarized Financial Position of the Company

ACCOUNTING POLICIES AND NOTES TO ACCOUNT FORMING PART OF FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2013

Note – 25

(I) SIGNIFICANT ACCOUNTING POLICIES :

A. Basis of Preparation of Financial Statements:-

The financial statements are prepared under the historical cost convention and comply in all material aspects with the applicable accounting principles in India and accounting standards notified under sub-section (3C) of section 211 of the Companies Act, 1956 and the relevant provisions of the Companies Act, 1956, as adopted consistently by the Company.

B. Use of Estimates:-

The preparation of the financial statements in conformity with Indian GAAP requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known / materialize.

C. Own Fixed Assets:-

Fixed Assets are stated at historical cost including any attributable cost including taxes & other duties, freight, installation & other direct or allocable expenses and related borrowing cost for bringing the respective assets to its working condition for its intended use, less accumulated depreciation. All Costs, till commencement of commercial production is capitalized under Manor Refinery Plant.

All the direct costs, expenditure during the project construction period (net of income) are specifically attributable to construction/acquisition of fixed assets and advances against capital expenditure are shown as Capital Work in progress until the relevant assets are ready for its intended use.

D. Depreciation:-

Depreciation on Fixed Assets has been provided as per the Straight Line Method of depreciation at the rates and manner prescribed under Schedule XIV to the Companies Act, 1956 amended. The depreciation has been provided on pro-rata basis for the assets purchased during the year including capital expenditure on land & building taken on lease/Leave & License basis but excluding for Computer Software. In case of Computer Software, depreciation is provided as per straight-line method at the rates provided in schedule XIV of the Companies Act, 1956 amended in respect of Computers.

E. Revenue Recognition:-

Sale of Goods :

Sales are recognized net of returns and trade discounts, on transfer of significant risks and rewards of ownership to the buyer, which generally coincides with the delivery

of goods to customers, sales exclude sales tax and value added tax.

Other Income:

Interest income is recognized on time proportion basis taking into account the amount outstanding and rate applicable. Dividend income is recognized when the right to receive the payment is established by the balance sheet date.

F. Inventories :

Inventories are valued at the lower of cost (on FIFO basis) and the net realizable value after providing for obsolescence and other losses, where considered necessary except for by-product, which is valued at estimated realizable value . Cost includes all charges in bringing the goods to the point of sale, including octroi and other levies, transit insurance, and receiving charges. Work-in-progress and finished goods include material cost, appropriate proportion of overheads and, where applicable, excise duty.

G. Foreign Currency Transactions:

Transactions denominated in foreign currencies are normally recorded at the exchange rate prevailing on the date of the transaction or that approximates the actual rate at the date of the transaction.

Monetary items denominated in foreign currencies remaining unsettled at the year- end are restated at the exchange rate prevailing at end of the year.

H. Investment:

Long-term investments are carried at cost less provision for diminution, other than temporary in the opinion of the management, in the value of such investments.

I. Impairment of Assets :

Pursuant to Accounting Standard 28 "Impairment of Assets", The Company has a system to review the carrying values of assets / cash generating units at each Balance Sheet date. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognized, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor. When there is indication that an impairment loss recognized for an asset in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognized in the Statement of Profit and Loss, except in case of revalued assets.

J. Employees Benefit:

- a) The Company's contribution in respect of Provident Fund is charged to Profit & Loss account every year.
- b) The Company has created a trust and has taken group gratuity policy with the Life Insurance Corporation of India for the future payments of retiring gratuities.

The liability for the defined benefit plan of Gratuity is determined on the basis of an actuarial valuation by an independent actuary at the year end which is calculated using Projected 'Unit Credit Method'. Actuarial gain and losses which comprise experience adjustment and the effect of changes in actuarial assumptions are recognized in the Profit and Loss Account.

K. Borrowing cost:

Borrowing Cost that is directly attributable to the acquisition or construction of qualifying assets is capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for intended use. Other borrowing cost is recognized as expenses in the period in which they are incurred.

L. Taxation:

Taxation expenses comprise current tax and deferred tax charge or credit. Provision for income tax is made on the basis of the assessable income at the tax rate applicable to the relevant assessment year.

Deferred tax resulting from "timing difference" between taxable and accounting income is accounted for using the tax rates and laws that are enacted or substantively enacted as on the balance sheet date. Deferred Tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be adjusted.
